

## Wastewater Utility Green Power Report

July 2011

Electricity Generated in July: **62,535 kWh (kilowatt hours)**

This is equal to the electricity used by 68 homes in a month.

This amount of electricity would have cost \$4,377 if it had been purchased from Duke Energy.

**56,000 gallons of grease** were processed in our digesters for the month.

**18% of our plant's power has been generated  
on-site in 2011.**

The City of West Lafayette's Wastewater Utility has pledged to generate at least 10% of its electricity on-site in 2011 as Indiana's first wastewater plant to become an EPA Green Power Partner.
